Subject: RE: Hoosick Falls progress report

To all:

NYSDOH spoke with the Village Hoosick Falls Mayor. Here are the important points:

- 1) The details on how bottled water will be provided to Village residents as an interim measure have been agreed upon. The plan is that the program starts this Friday, if not, then on Monday. The lawyers still need to sign the legal documents, but the details on the mechanism and program (e.g. supplier, tracking system, quantity) for bottled water are in place.
- 2) There have been provisions made so that residents of elderly /long term care facilities that cannot get to the market for the bottled water will be able to take advantage of the bottled water program.
- 3) The Mayor is composing a letter for the December 1st water bill to apprise residents of the current information. The last three water bills have included a letter about PFOA.
- 4) The Village maintains information on their web-site about the PFOA contamination.
- 5) The December 2nd availability session is a go, he would like us (County too) to be there with a toxicologist and factsheet. The timing is 5 to 8 pm. Besides us, the Mayor wants Saint Gobain representatives to be there as well the consulting engineers for the Village about the proposed treatment for the public water supply. He is hoping that they will be able to show schematics of what is to be built.

NYSDOH is sampling additional private wells this Wednesday and Thursday, which should give us more information. Additional sampling is being coordinated with DESA and NYSDOH labs. If you have any questions, please contact me.

Thanks,
